ABYC Updates 2009 Schedule of Certifications and Seminars

February 25, 2009, Annapolis, MD: The American Boat & Yacht Council (ABYC), a leader in technical workforce training, education and certification programs for marine industry, has updated its 2009 schedule of certification and seminar courses. Updated dates, locations and course descriptions can be found at www.abycinc.org.

In addition to scheduled training, ABYC also offers flat-rate, on-site training courses, seminars and custom tailored technical education and training offerings that can be hosted at any location upon request - both nationally and internationally. ABYC has partnered with several marine trade associations to bring on-site training to their members at a reduced rate. The Maine Marine Trades Association (MMTA) and the Northwest Marine Trade Association (NMTA) are two organizations that are taking advantage of the on-site training program. For 2009, the MMTA has decided to sponsor four on-site classes for their members, and the NMTA is scheduling classes for 2009 - 2010.

Registration information and detailed descriptions for any of the courses can be found at www.abycinc.org, or to host an ABYC course at your facility, contact the ABYC Education department at (410) 990-4460.

ABYC Certification & Seminars – 2009

ABYC has been developing, writing and updating the safety standards for boat building and repair in the United States for over 50 years. ABYC is actively involved with the International Organization for Standardization (ISO) as well as education and certification programs for marine technicians. These standards are available on CD-ROM, online (*Web-STIR* and *ABYC Standards Powered by Rulefinder.net*) and in printed form. Membership and general information can be requested by visiting the ABYC web site at www.abycinc.org.
